

YEAR 5 – SPRING 1 TOPIC WEB - BRAZIL

ENGLISH

We will be focusing on our class core text, *The Explorer* by Katherine Rundell.

As the children explore the text, they will do different writing styles, such as setting descriptions, creative story writing and instruction writing.

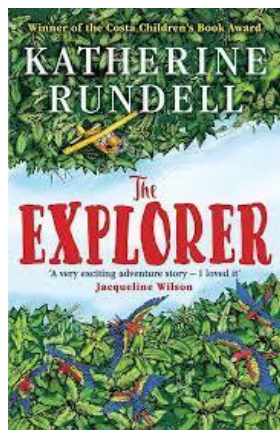

MATHS

This term our focus will be on multiplication and division, and addition and subtraction.

This will build on the children's prior knowledge of multiplication and division, whilst teaching them new methods to solve problems.

SCIENCE

Our focus is on Force Mechanisms. This will lead us to looking at levers, pulleys, and gears and how they work. We will also conduct an investigation around friction and how objects travel over different surfaces.

HUMANITIES

Our key learning will be based on Brazil. The children will learn about life in Brazil, its climate, and geographical features. They will also be introduced to the push and pull factors of different locations and their features.

RE

We will be looking at the question: "If God is everywhere, why go to a place of worship?" We will explore different places of worship across religions and their significance to those who practice them.

ART & DESIGN

Linking in with our learning in geography, the children will be learning about Athos Bulcao. We will be exploring his art style, printing, and working towards completing our own piece inspired by his work.

COMPUTING

We will be learning about programming. The children will be involved in basic programming and building on their general computing skills and knowledge.
